

The Greenhills Limestone formation is located in the municipality of Camalig. This area is remote and will require some trekking from 2 to 7 hours depending of the trail you will select to reach the Greenhills Limestone formation. The Greenhills Limestone formation is an old coral barrier uplifted by tectonic movement and it is the playground to discover an authentic remote filipino village. Along the path you will the chance to ride a water buffalo, swim in pristine water spring and explore a remote cave. This is still an "untouch" area and the site should be explore with a total respect to the local community. No personal garbage can be tolerated on-site.

Duration 2 to 7 hours depending of the trails
